memory .

The classic design from Mid-Century heroes Charles & Ray Eames, rebuilt for the modern working environment.

The Eames Aluminium Group & Soft Pad chairs were a departure from the traditional solid seat shell and evolved to support a stretched seat back suspension.

The Memory range is the finest quality American Designed chairs available in Australia, taking the classic model, enhancing durability and comfort to deliver an iconic range of work chairs for the modern workplace.

memory stitched medium

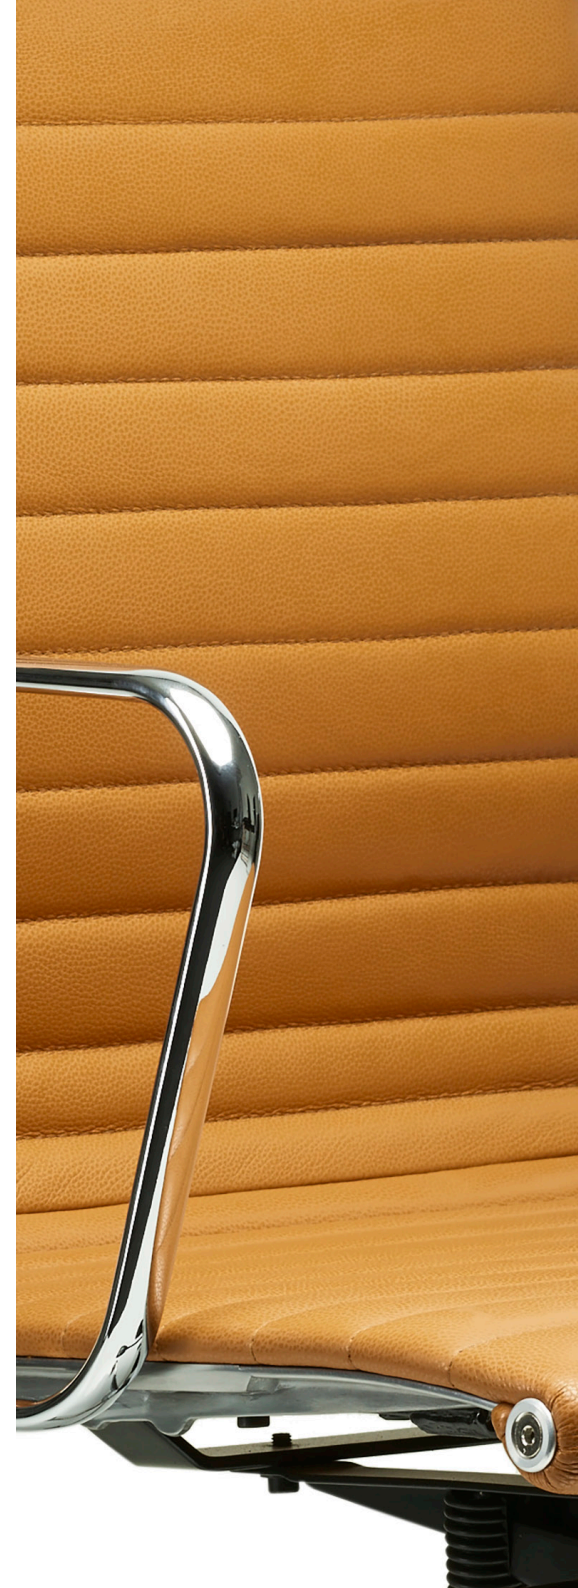

Premium quality is a prime consideration for this chair design as they are a 'slung upholstered' style of chair. This means, unlike almost every other chair, they don't have a solid seat base structure.

Cheaper replicas 'sag' over time, and eventually the stitching comes apart rendering the chair useless.

The Memory range are built for life and backed by our Lifetime Warranty.

memory mesh medium

The Memory frame features an innovative suspension that creates a firm, flexible "sitting pocket" that conforms subtly to the body's shape.

The suspension is created by stretching a continuous piece of seat-back upholstery tautly between lightweight aluminium side ribs.
